TIME SYNCHRONIZATION | SOLUTIONS
With the help of Amazon Web Services, OneVue™ keeps all your clocks synchronized to the exact same time, even through Daylight Saving Time shifts and power outages.

With no servers to install or software to maintain, cloud-based OneVue™ takes the hassle out of deploying a facility-wide synchronized time solution. Simply connect the bridge and power-up the Smart-Sync™ clocks, and within minutes, they obtain accurate time information from OneVue™.

SECURE, CLOUD-BASED SOFTWARE
OneVue™ capitalizes on the safeguards inherent in Amazon Web Services to protect your data – including banking-level security and encryption.

ACCESSIBLE ANYWHERE
Built utilizing a mobile-first, responsive design, OneVue™ can be accessed on any device, using any browser, without the need for a separate app or plug-in.

YOUR REPORTS, YOUR WAY
OneVue™ lets you set up recurring reports that can be sent to any device, so you’ll know right away if clock batteries are low, the network signal is lost or a clock is not synchronized.

Dependable Primex ANALOG CLOCKS come in a variety of colors, sizes and dial options to fit any style or budget.
THE RIGHT TIME, ALL THE TIME

Smart-Sync™ clocks with Bluetooth® wireless technology help facility teams operate more efficiently, slash maintenance costs and focus resources on higher priority projects.

Smart-Sync utilizes Bluetooth low energy (BLE) technology to establish a network of wireless system clocks and bridges. Bridges acquire NTP time from OneVue™ and pass it to clocks within the network using a self-healing mesh. The BLE network also gathers individual clock status information which is sent to OneVue.

SELF-FORMING, SELF-HEALING
Clocks create the network based on the strongest signal to another clock or bridge. In the rare event one clock fails, other clocks form the network around the faulty clock.

INTERFERENCE ISN’T AN ISSUE
BLE is an “always-off” technology; when data is being exchanged, Smart-Sync clocks and bridges leverage one of three BLE-only channels to eliminate Wi-Fi interference.

TAKE BACK YOUR BANDWIDTH
By leveraging a handful of bridges which communicate only once a day, Smart-Sync eliminates the need for hundreds of “always-on” clocks consuming network bandwidth.

Bright LEDs and sleek designs make Primex DIGITAL CLOCKS & TIMERS as attractive as they are functional.

ONEVUE ALSO SUPPORTS A WIDE VARIETY OF POE CLOCKS
**BLUETOOTH® LOW ENERGY**

**A Whole New Way to Look at Bluetooth**

* **Smart-Sync™** clocks leverage Bluetooth® low energy technology.*

**WHY PRIMEX?**

Primex is a leading provider of wireless time synchronization technologies, serving more than 16,000 locations worldwide.

**INNOVATIVE**

Primex continues to be a technology leader in cloud-based products and services.

**EXPERIENCED**

With more than 1 million devices in use worldwide, our expertise is unmatched.

**TRUSTED**

Primex solutions can be found in more than 16,000 end-users across 27 countries.

**HOW TO BUY**

*With partners across the world, help is just around the corner.*

Primex synchronized clock systems are available through our certified partner network. For help in locating a certified partner in your area, please give us a call Monday-Friday from 8am-5pm CT at (855) 598-9494, or visit us online at primexinc.com.
