

Wood and Gallery Series Analog Clocks

72 MHz

Update your facility with perfectly synchronized time. The 72 MHz analog clocks utilize GPS and Network Time Protocol (NTP) to keep all your clocks in sync, even after Daylight Saving Time changes. They synchronize seamlessly with your Primex 72 MHz system using our proprietary 72 MHz signal that transmits easily through common building materials and across longer distances with less potential for signal interference. 72 MHz analog clocks are available in a range of styles.

Wood Series Analog Clocks

High-tech accuracy is presented in a traditional look with the Wood Series Clocks. Ideal for offices, libraries, conference rooms, and entryways, the solid hardwood frame is available in a variety of finishes. Dial faces are available with Arabic numerals on ivory dials or Roman numerals on antique dials. Dial faces are available with Arabic numerals on ivory dials or Roman numerals on antique dials.
