

Primex OneVue Sense™ Advanced Plan

Customizable Asset Monitoring

The Primex OneVue Sense Advanced plan gives you complete peace of mind knowing your valuable assets are safe and sensitive environments are fully monitored. Thanks to a connected network of sensors throughout your facility, manual logging will be a thing of the past. Your staff will have more time to focus on other tasks, like those impacting patient care, knowing they are automatically meeting compliance requirements and reporting regulations.

Automate Your Monitoring and Data Logging to Better Manage Workflow Efficiency

- Minimize staff burden to focus on critical responsibilities such as patient care, building maintenance, and operational efficiencies
- Stay compliant with regulations from the CDC, TJC, DNV, and more
- With the data at your fingertips and the ability to monitor and report from any device, take comfort knowing your information is readily available and secure

The Primex OneVue Sense Advanced Plan

Included in the Primex OneVue Sense Advanced plan is:

- Simple and flexible alert options to notify you when problems require intervention
- Complete suite of report types for scheduled and manual documentation of readings and user actions
- Unlimited users for web-based access to OneVue
- Data archive for 7 years

“ The OneVue system has saved thousands, maybe tens of thousands of dollars in medical product, especially since we know what’s happening before a refrigeration unit goes bad. Catching problems before they got serious gave us peace of mind.”

Adam Shaw
Kossuth Health

Hardware Assurance Program

To bolster the reliability of your newly installed sensors, the optional Hardware Assurance Program works effortlessly with the Primex OneVue Sense Advanced plan. The program:

- Provides coverage for hardware problems or challenges that may arise, including accidental damages within reason
- Probe Replacement Program
- Comes with hardware compliance assurance

The Hardware Assurance Program helps minimize security and compliance threats from upgrades or replacements should requirements or standards change unexpectedly.
